

## # About UM6P

Young and ambitious university in Morocco with a great commitment to strong values - including ethics, inclusivity, sustainability and community engagement – we offer our students a wide range of undergraduate, graduate and doctoral programs in hard science, engineering, health, business and management, economics and social sciences.

We are rapidly growing and aim to position ourselves among the major global institutions in the medium term by expanding the impact of our research and education.

Wherever you are from, whatever you study and whatever your career plan, you are welcome to join our community. We are here to help you succeed, open your mind to various possibilities and achieve your ambitions.

Incubated by an industrial group and created as a non-profit university in Benguerir (north of Marrakesh), UM6P initially began in 2013 with the Émines School of Industrial Management. Subsequent schools were established, with accelerated growth after the official inauguration by His Majesty King Mohammed VI in 2017.

Today, UM6P is rapidly evolving into an internationally recognized applied-research university. With a robust faculty, state-of-the-art research facilities, global partnerships, and a thriving entrepreneurial ecosystem, UM6P serves as an innovative hub that prepares students for the future of work.

On our two student campuses (Benguerir and Rabat), we will offer you the opportunity to immerse yourself in the university's vibrant research culture and stimulating environment, and to learn from researchers at the forefront of their respective disciplinary fields.

You will also benefit from a comprehensive set of student support services and a wide range of extracurricular activities to provide you with a rich and fulfilling student life experience.

More than just a traditional academic institution, UM6P is a platform for experimentation and a pool of opportunities, which students like to call «the school of life». Being a representation of the outside world, with its challenges, perspectives and promises, the university aims to reveal the potential of Moroccan, continental and international youth.

## # Our promise in 5 points

### 1 A pedagogy that breaks away from traditional methods

Breaking the codes of traditional teaching, UM6P offers innovative approaches to learning.

These include project-based and experimental learning in well-equipped Research labs and Fablabs, as well as in LIVING LABS where you can apply your knowledge on the field. Full-scale experimentation platforms (experimental farm, industrial complex, simulation laboratory, etc.), these LIVING LABS give you the opportunity to forge field experience essential to the start of your career.

UM6P also offers virtual classes and online courses developed by the university and its partners. Elevating the game, Gamification and Peer Learning are being introduced, for instance at 1337 Coding School, as new pedagogical methods.

### 2 Preparing our students for the real world of work

Strongly connected to the business world by essence, UM6P wants to represent a place where academia meets business. As a result, you benefit from close and regular industry connexions: case studies and application projects, field visits, immersion in living labs, internships, regular meetings with companies as part of the Career Center agenda, etc.

For those of you who are interested in entrepreneurship, as well as for those already carrying a project and wishing to set up their own business, a mature entrepreneurial ecosystem, led by the Entrepreneurship & Venturing Division, is at your disposal to support you at every stage of your project: from ideation, acceleration to possible financing.

---

### 3 Offering a great student life

A wide range of activities that allow you to make friends and networks, develop new skills and take on challenges or get involved in social initiatives. Join one of the numerous student clubs (UM6P Band, Alchimija, Cyborg, Enactus, Rotaract, ...), play sports, including at the competition level (Sport Department), engage yourself in volunteer initiatives towards UM6P ecosystems (Social Experience Program), become an ambassador for environment (Sustainable Development), or sing with UM6P choir... Choices are yours.

### 4 Always on support

A comprehensive range of student services supporting you during your journey including dedicated teams specifically helping international students.

In addition to a faculty, driven by the desire to share their knowledge and experience and to help you grow, several teams provide you with support throughout your journey at UM6P: Orientation on Arrival (Admission); Health & Wellbeing (Health Center), Language Proficiency (Language Lab), Career Support (Career Center, SCALES), International Student Advisory (International Student Club; Outreach Country Ambassadors), Safe Campuses (Facility Management), General Knowledge (Learning Center Library; Open Minds initiative), ...

### 5 Giving any bright student the chance to pursue relevant academic studies

In line with its civic engagement and its orientation towards excellence, UM6P supports any excellent student, regardless of their backgrounds (social, gender, nationality), to access high-ranking research or graduate studies, thanks to a tuition exemption scheme.

This scheme benefits a large majority of our students.

---

### # On-campus academic programs

Science & Technology Division

S&T Division fosters research, innovation and education in key scientific and technological fields to address current burning issues and propose African solutions to global challenges. The Division is home to a large variety of schools and offers a wide range of innovative and interdisciplinary academic programs on cutting-edge topics, closely linked to the research activity of UMBP laboratories. These programs offer a solid scientific and technological training while ensuring the societal inclusion of scientific advances and aim to prepare you to meet contemporary challenges.

#### Schools

- School of Industrial Management / EMINES
- Green Tech Institute / GTI
- School of Architecture, Planning & Design / SAP+D
- UM6P School of Computer Science – College of Computing / CC
- School of Chemical, Minerals and Biotechnology Engineering / SoChemMIB-IST&I
- Center for Doctoral Studies / CEDoc
- Schools of Coding / 1337 & YouCode

#### Post-Bac Degrees

- Engineering Degree Preparatory Cycle in Industrial Management / EMINES
- Engineering Degree Preparatory Cycle in Computer Sciences / CC
- Engineering Degree Preparatory Cycle in Chemical, Minerals and Biotechnology / SoChemMIB\*
- Architect Program (Bac+6) / SAP+D

#### Engineering Cycles

- Engineering Degree Industrial Management / EMINES
- Engineering Degree Computer Sciences / CC

#### Master Degrees

- Master Electrical Engineering for Renewable Energies and Smart Grids / GTI
- Master Industrial Technologies for the Factories of the Future / GTI
- Master Green Building Engineering and Energy Efficiency / SAP+D

#### Doctoral degree

- Science, Technology and Engineering / CEDoc

#### Specific programs

- Programs of coding / 1337 & YouCode

- Education Fellow Preparation / EMINES
- Master of Engineering in Materials, Energy and Entrepreneurship / MSN (Materials Science, Energy, and Nano-engineering Department)

## # Health Division

### Schools

- Faculty of Medical Sciences / FMS
- Higher Institute of Biological and Paramedical Sciences / ISSB-P

### Post-Bac Degrees

- Doctorate in Medicine / FMS (100% English)
- Doctorate in Pharmacy / FMS (100% English)
- Bachelor in Nursing Care, General Nurse Option/ISSB-P

Launched more recently, the Medical and Paramedical Division's mission is to create a healthcare ecosystem combining academic activities, scientific research and healthcare provision through Benguerir's Smart Health Care City project. The Division is committed to building top-quality medical and paramedical curricula in response to current and future health issues and technological developments in medical and paramedical practices.

The teaching approach is based on clinical simulation, reflective analysis and evaluation of professional practices.

The Smart Health Care City project will be completed shortly and be up and running by September 2024. It will include a University Hospital Center, a Rehabilitation Center and a Geriatric Hospital.

---

## # Social Sciences, Economics & Humanities Division

All undergraduate and graduate study programs of The Social Sciences, Economics and Humanities Division are housed at Faculty of Governance, Economics and Social Sciences (FGSES). The Bachelor's, Master's and the Ph.D levels in the fields of Humanities and Social Sciences lay due emphasis upon public policy-making and analysis of specific issues within Morocco and, more broadly, the African Continent as a whole. Such programs combine the classical corpus knowledge with the latest findings, discoveries and insights in social sciences, economics and humanities to ensure world-class tuition and research in four major disciplinary areas.

### Schools

- Faculty of Governance, Economics and Social Sciences / FGSES
- Center for Doctoral Studies / CEDoc

#### Post-Bac Degrees

- Bachelor in Applied Economics / FGSES
- Bachelor in Political Science / FGSES
- Bachelor in Behavioral and Social Sciences for Public Policies / FGSES
- Bachelor in International Relations / FGSES

#### Master Degrees

- Master in Behavioral and Social Sciences for Public Policies / FGSES
- Master in Global Affairs / FGSES
- Master in Political Science / FGSES
- Master in Economic Analysis and Public Policy / FGSES
- Master in Quantitative Economics / FGSES

#### Doctoral Degrees

- Economics / CEDoc
- Political Science and Global Studies / CEDoc
- Behavioral and Social Sciences / CEDoc

#### # A Step by step guide to UM6P admissions

We invite you to understand how the admissions process works, from completing your application, to taking the entrance exam or submitting your scholarship application and to pay attention to the admission deadlines. Our admissions teams are there to support you throughout the process, including guiding you in the choice of the programs you want to pursue.

#### Application Process

After verifying that you meet all the program(s) requirements and preparing documentation, please proceed to the following step:

#### Application Supporting documents

- ID Photos
- Copy of National Identity Card / Passport
- Motivation Letter
- Copy of all diploma or certificate degrees
- Official academic transcripts
- Curriculum Vitae (only for master candidates)
- Letters of recommendation (only for master candidates)

We invite you to consult the details of the supporting documents to be provided with each program.

For details on the application process (including application platforms, deadlines, required documents,...), please refer to the following page:

<https://um6p.ma/admissions>

#### # A Highly Selective Admission Process to Recruit the Best Students

Our admission process is rigorously selective, designed to identify and recruit the most talented and promising students. Each year, we have the privilege of welcoming a cohort of exceptional students who bring their passion, determination, and desire for excellence to our academic community.

Nearly 2,000 Students Admitted for the 2023-24 Academic Year from an impressive total of over 35,000 complete applications. This also demonstrates the strong appeal of our institution as a leading educational choice.

This rigorous selection process is a testament to the quality of our academic programs, our dedication to world-class education, and our belief that our students are the key to the future, ready to successfully tackle the challenges of tomorrow.

We take pride in welcoming these future leaders and innovators to our academic community and look forward to seeing them achieve their full potential.

#### # UM6P Appealing Grant Scheme

Driven by civic values and convinced that an empowered youth is a necessity to build a bright future for tomorrow's Africa, UM6P Polytechnic University - through its foundation (Fondation Ibn Rochd pour les Sciences et l'Innovation - FIRSI) - supports a large number of promising students, engaged in high-level studies and lacking the necessary personal resources, by offering an appealing grant scheme.

The objective of the UM6P Grant Scheme is to give a chance to any excellent student to pursue relevant academic degrees regardless of nationality, country of origin, socio-economic background, gender...

The need-based grant corresponds to a partial or total scholarship for tuition fees and living costs at UM6P.

Students can apply by submitting a request along with supporting documents, which will be assessed based on a range of social criteria.

----

We firmly believe that education should not be limited by financial barriers, and we are committed to providing equitable educational opportunities to all who aspire to academic excellence.
